SITUATION SUMMARY

Cal OES Activation Status

State Operations Center	Inland Region EOC	Coastal Region EOC	Southern Region EOC
Level 1	Level 1	Level 1	Level 1

Organized Demonstrations, State of California

Per the Cal OES Law Duty Officer:

- The Governor's Office of Emergency Services, Law Enforcement Branch is monitoring several organized demonstrations throughout the State of California.

Cal OES Coastal Region

Helicopter Operations/Training, Lake Mendocino, Mendocino County

On 07/12/16 and 07/13/16, the Mendocino County Sheriff's Office will be conducting a joint training effort between the California National Guard, Cal Fire, Search and Rescue Teams from Lake, Napa, Marin, and Mendocino Counties, the US Army Corps of Engineers, and the Mendocino County Sheriff's Office. This training will occur around Lake Mendocino and around the Cal Fire Station at Howard Forest from 0700 hours through 0000 both days.

- On 07/11/16 the public will see an increase in helicopter operations regarding this training exercise in the area of Lake Mendocino, around the Ukiah Municipal Airport, and on the Ridgewood Grade near the Cal Fire Station.
- For Safety reasons during this training the US Army Corps of Engineers has closed the South Lake Mendocino Wildlife Area, including all hiking trails east of the Lake Mendocino Dam to the general public. These areas will re-open on 07/15/16.

San Francisco Bay Ferry Service Disruption

Due to major engine maintenance, the SF Bay Ferry will be out of service for the 0800 hours Vallejo departure and 1730 hours SF Ferry Building (SFFB) departure for the next two weeks. From 07/11/16 through 07/22/16, there will be two buses serving the 0800 hours Vallejo departure and two buses serving the 1730 hours SFFB departure.

WEATHER SYNOPSIS BY REGION

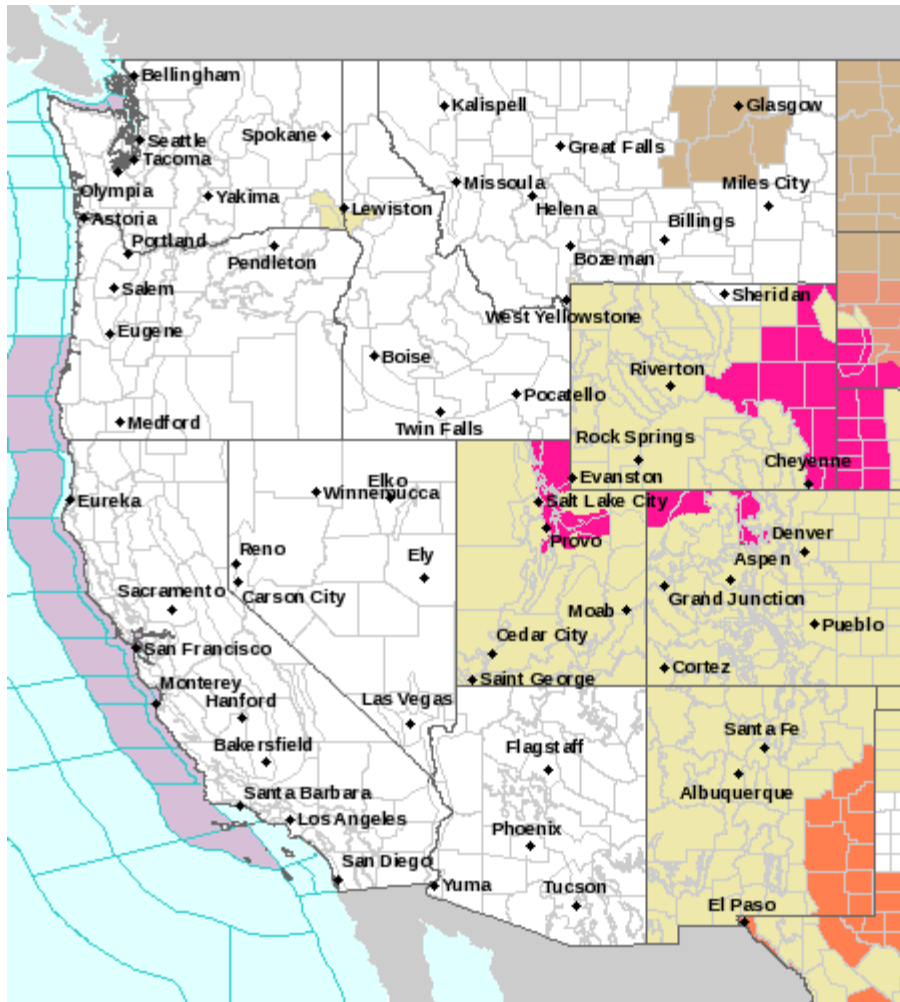

NORTHERN CALIFORNIA

A West-to-East zonal flow pattern will be in place over Northern California through Thursday as a series of lows track across the northern tier states and high pressure builds over the Desert Southwest and southern California. The high pressure will gradually become the dominant feature for Northern California, producing a drying and warming trend. By Wednesday temperatures will warm to near normal. A light north to northeast downslope surface wind pattern will be in place during nights and mornings in and around the Sacramento Valley, but come to an end by early afternoon each day. Afternoon southwest to west winds east of the Cascade-Sierra crest will gust to around 30 mph each afternoon. Coastal regions will be mild and breezy under the influence of the marine layer. On Friday a low pressure trough will begin to develop overhead and it is expected to deepen through the weekend. There is only a slight chance of afternoon convection in far northern areas beginning Friday. The bigger impact will be a gradual cooling trend with increasing winds. Areas east of the crest will have afternoon gusts to 30-35 mph.

SOUTHERN CALIFORNIA

Windy and very dry over the mountains and deserts Friday through early next week. A weak Pacific trough over the West Coast will maintain near to a little below normal temperatures today, with mid 70s to mid 80s across the mountains and mid 80s to mid 90s in the valleys. Minimum humidity will be mainly between 12% and 25% away from the coastal areas, but there will be widespread single digit minimum humidity across the deserts. Strong high pressure over West Texas will become centered over the Desert Southwest bringing around 5 degrees of warming away from the coastal areas Wednesday and Thursday. Minimum humidity will drop into the single digits and teens away from the coastal areas Wednesday and Thursday. Another weak Pacific trough will move over the West Coast Friday through early next week. This trough will cause temperatures to cool to a little below normal by Saturday and then there will be little change in temperature through early next week. Widespread minimum humidity in the single digits and teens will continue above and away from the marine layer through early next week. South to west afternoon and evening winds of 15 to 25 mph with gusts to 40 mph will surface across the mountains and deserts Friday through early next week.
